

West Runton Mammoth Tours

Expert guided tours of the world famous
'West Runton Mammoth'
At the *Norfolk Collections Centre*,
Gressenhall Farm & Workhouse

Guided tours of the 'West Runton Mammoth' with Dr David Waterhouse, Senior Curator of Natural History Norfolk Museums Service

Before Woolly Mammoths roamed the plains of Ice Age Britain, there was an even bigger mammoth on the scene. In fact, Steppe Mammoths (including the West Runton Mammoth) may have been the largest elephant species to have existed. At over four metres tall, the West Runton Mammoth stood taller than a double-decker bus, and when alive weighed twice as much as a modern African Elephant. This mammoth dates from the Cromerian Stage (around 700,000 years old), and is the oldest and largest mammoth skeleton to have been found in the UK.

Join palaeontologist and curator Dr David Waterhouse as he reveals the fascinating story of this extinct giant in its purpose-built research facility at the *Norfolk Collections Centre*.

2017 tour dates:

Wednesday 7th June

11am, 1pm and 2.30pm

Monday 14th August

11am, 1pm and 2.30pm

More dates to be added in 2018
