

This is a radical re-think of GP12, based on a high-definition scan of the original Olive Edis negative recently obtained from Cromer Museum. We can now see how the panels between the cables are formed – of 2-stitch garter ribs. This motif is also used in GP17.

The cables cross 19 times in the height of the yoke. Counting garter stitch rows there are 190, so crossing every 10 rows. The cables are 4 over 4. On the right below is the detail of the arm, showing the 2-stitch garter rib (upside down, as arms are knitted from the top down).

## Estimated tension

Cables	11 x 8	88
2-stitch ribs	12 x 8	96
Extra ribs, first and last panel		4
False seam		2

---

190

Front and back 380 (95 ribs in the welt)

---

If tension is 12 spi chest is 31.8 inches

If tension is 11.5 spi chest is 33 inches

**If tension is 11 spi chest is 34.5 inches** (he is dreadfully thin)

If tension is 10 spi chest is 38.0 inches
